## Education

**Kalasalingam Academy of Research and Education**  
B.Tech in Computer Science and Engineering

2024–2028  
**CGPA: 8.3/10**

## Technical Skills

**Languages:** Java, JavaScript, SQL, HTML, CSS

**Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Algorithm Development, Problem Solving, Complexity Analysis, DBMS, Computer Networks, Operating Systems

**Frontend:** React.js

**Backend:** Node.js, Express.js, REST APIs, WebSockets

**Database & Caching:** PostgreSQL, Redis

**Cloud & Tools:** AWS, Docker, Git, GitHub, Linux Basics

**Engineering:** Automated Testing, API Development, Cloud Computing, Full-Stack Development

## Projects

### Civic Resolve | React.js, Node.js, Express.js, PostgreSQL, PostGIS

- Architected a crowdsourced civic issue reporting platform for submitting, tracking, prioritizing, and resolving location-based civic issues.
- Developed REST APIs and a React-based administrative dashboard for issue visualization, filtering, department assignment, status tracking, and analytics.
- Implemented geospatial issue processing, severity scoring, and duplicate detection to improve automated issue triage.
- Designed relational database schemas and optimized location-based queries using PostgreSQL/PostGIS indexing.
- Applied Design Thinking principles to identify citizen pain points and design an end-to-end civic issue reporting and resolution workflow.

### Apex Pulse | React.js, Node.js, Express.js, PostgreSQL, Redis, BullMQ, Docker, AWS

- Engineered a real-time API observability platform for collecting, processing, and visualizing application telemetry and service-health metrics.
- Developed REST APIs and WebSocket-based dashboards to monitor request volume, latency, errors, and service health in real time.
- Implemented asynchronous telemetry processing using Redis and BullMQ workers to decouple metric ingestion from background processing.
- Added Redis-based caching, rate limiting, structured logging, and database optimization to improve application performance and reliability.
- Containerized application services with Docker and incorporated AWS deployment concepts and cloud-native architecture practices.

## Leadership

### Creative Head, IKSC | IUCEE KARE Student Chapter

- Led creative and communication initiatives for technical events, recruitment campaigns, and student activities.
- Collaborated with cross-functional student teams to plan and deliver event branding, campaigns, and digital content.

## Achievements

- Winner of two hackathons, including an IEEE Hackathon.
- Presented a student project at ICTIEE 2026 Conference.
- Smart India Hackathon Participant.
- Applied Design Thinking methodologies across academic and technical project development.
